

# QUICK START OF VMZ SOLAR AWNING BLIND

GB

The **ZWP SA 4 remote control** is supplied in one packaging with the awning blind.  
The awning blind is **factory programmed** on channel No. 1 !!!

Install the awning blind in accordance with the **NC9AR**

Put batteries into the remote control

Check the operation of the awning blind

Check the operation of the awning blind folding

Information concerning programming, change of parameters, changes in configuration settings, calling individual functions is contained in the Programming and Usage Instructions (code NC9AS).

**If the awning blind is working properly, you do not need to perform any additional steps!!!**

The awning blind is equipped with the **manual operating button** positioned in its upper part. It enables control of the awning blind in case of losing the remote control or wearing off its batteries. If after mounting the awning blind cannot be launched via the remote control, check operation with the **manual operating button**.

If the awning blind works with the manual operating button, and yet it cannot be launched via remote control, make

**RESET** and go to **PROGRAMMING!!!**
